## Southeast Asia's Premier Marketplace for carpet, flooring & Interior solutions

As the global economic landscape pushes companies to explore new business channels, Southeast Asia has emerged as a dynamic growth frontier. Boasting rapid urbanization, soaring infrastructure demand, and supportive policy frameworks, the region offers unparalleled opportunities for international brands seeking expansion.

By 2030, Southeast Asia is expected to require over USD 210 billion in annual infrastructure investment. Countries like Thailand, with their strategic location, efficient logistics, and robust industrial clusters, serve as ideal gateways for companies to access the wider regional market.

In 2026, DOMOTEX South East Asia will bring together Thailand based Worldex G.E.C.Co., Ltd.'s extensive local network and DOMOTEX's global resources. The event will be co-located with Future Build Asia, Building & Architect Thailand, and R+T South East Asia. This comprehensive platform spans the full spectrum, from construction to interior finishing, offering unmatched opportunities for sourcing, business development, and regional growth.
